Print some arrays

Problem	Submissions	Leaderboard	Discussions

Write a C program to read n values from the user and store it in the array. Reprint the values stored in the array and also print the value of second element in the array.

Input Format

- First input represents the number of values storing in the array

- Represent the values to be stored in the array

Constraints

None

Output Format

- The first line contains the values stored in the array.

- The second line contains the value of second element.

Sample Input 0

```
5
3
5
8
9
2
```

Sample Output 0

```
Entered array: 3 5 8 9 2
5
```

C

```c
1  #include <stdio.h>
2  #include <string.h>
3  #include <math.h>
4  #include <stdlib.h>
5
6  int main()
7  {
8      int  arr[10],i,n;
9      scanf("%d",&n);
10     printf("Entered array: ");
11     for(i=0;i<n;i++)
12     {
13         scanf("%d",&arr[i]);
14         printf("%d ",arr[i]);
15     }
16     printf("\n%d",arr[1]);
17     return 0;
18  }
```

Congratulations, you passed the sample test case.

Click the **Submit Code** button to run your code against all the test cases.

Input (stdin)

```
5
3
5
8
9
2
```

Your Output (stdout)

```
Entered array: 3 5 8 9 2
5
```

Expected Output

```
Entered array: 3 5 8 9 2
5
```
